

Data Logging Equipment

Data Logger

LIM2000plus™ Data Logger for LIM2000CB

The data logger package consists of the following components:

- iPAQ PDA
- Serial communication converter
- Cables
- Manual
- Software
- Carrying case

An optional retrofit kit is available for existing applications. The task can be completed in less than one hour. Detailed instructions are included with the kit.

Record trends

Track equipment usage

Establish time dependence between alarm events and OR equipment usage

Compare leakage current profile for different OR activities

Use as stand-alone PDA for contact management, scheduling, appointments, etc

Programming Flexibility:

- Selection of logging and reading modes
- Manual start/stop of data logging
- Real-time display of Total Hazard Current (THC) and load current
- Writing and reading of log files
- Memo entry for each log file
- Predefined MS Excel sheet for data analysis and graphical display
- Time and date stamp of logged records
- Sampling of THC and/or load current based on % change setting

Note: Load current sensing is an optional feature of the LIM2000CB
